PROFILE

I'm a Junior Front-end Developer focused on React and building responsive, user-friendly interfaces. While I don't have commercial experience yet, I've built several practical projects that demonstrate my skills.

I work confidently with modern JavaScript, React with hooks, and CSS, and I'm actively expanding into TypeScript and Redux. I'm disciplined, reliable, and able to learn quickly, with strong commitment to delivering high-quality work. I'm eager to join a collaborative team, contribute to real projects, and grow through consistent effort and problem-solving.
